

State Project No. 713-53-0114
Bennett Road Bridge Over Natalbany Creek
Tangipahoa Parish
(Estimated Construction Cost: \$581,561.00)

The existing structure is structurally deficient and load posted at 20-35 tons. The structure serves the local public in day to day activities and is close to the I-55 corridor; it could become an area for future development.

The proposed structure's construction will add additional workers to a contractor's payroll and assist them in meeting equipment loan payments and payroll overhead costs.
